What are the positive and negative impact of technology on humans?

**ANSWER:**

**POSITIVE IMPACT:** Technology has made it easier, technology has driven advancements in medicine, agriculture, and manufacturing, leading to a higher quality of life for many, also to student positive impact is we use online platforms allow students to collaborate on projects and share ideas with classmates around the world. This fosters teamwork and communication skills.

**NEGATIVE IMPACT:** Because our eyes are so vital, the radiation from this may have an adverse effect on them. Addiction to technology is also a serious possibility. It is hard for individuals to understand or believe that technology was meant to be used for studying and beneficial purposes as it can also teach people negative things and incite conflict, establishing connections, conversing, and enjoying games.

Explain why computing and networking access is restricted in some countries.

**ANSWER:**

For reasons of national security, certain countries impose access restrictions on computer and networking resources. Access to specific websites or platforms, such as those that encourage political unrest or terrorism that are thought to constitute a threat to national security, may be blocked.

How information technology changes and affects culture as a whole?

**ANSWER:**

Information technology has provided new avenues for cultural expression, allowing individuals and communities to share their stories, traditions, and creativity with a global audience. Platforms such as social media, blogs, and streaming services enable people to create and distribute music, art, literature, and other forms of cultural content, bypassing traditional gatekeepers and intermediaries.

In what ways has the internet changed the ways of society?

**ANSWER:**

The internet has become a powerful tool for political and social activism, enabling individuals and groups to organize, mobilize, and advocate for change. Social media platforms and online petitions have played significant roles in shaping political discourse and driving social movements.

How does technology affect cultural change?

**ANSWER:**

Now we are living in a technological world now and we can't live without it. The way we communicate, learn and do our daily activities has changed and it has both negative and positive impacts on us. This technological age has positively impacted our little society. Technology has made travelling from place to place or from city to village or country to country easier and faster because of the invention of cars, buses, bikes and boats that we use in our everyday life, before the invention of cars, buses, bikes and boats people use to walk to their destinations or use a horse to get to their destination faster. Even the way of learning have been improved as well

and is also faster now because of the online learning, now we use the computer a lot now in our education system in order to communicate with the teacher or get home work from the email and now even hard copy books are becoming obsolete in this technology driven age that we live in because now there are devices you can use to get the soft copy of the books and also read from off it as well, the computer is also use to help students do research as well with the use of the internet. Technology has also changed the way the farmers plant their crops and also harvest their crops with the use of machine, now in this technological age people are not doing manual labor again like in the past only the poor people who cannot afford to buy these machines are doing manual labor,
